The author has US Patents in his credit in the field of purification of ultra pure water and has been one of the pioneers in commercializing membrane based (ED) technology in Indian successfully. The author has similar achievements to his credit in the technical field and strives to achieve success through his continuous efforts.

Product Description

The book is a critical self-analysis by the author that lays emphasis on the growing importance of materialistic possessions over moral values. A comparison is shown between the pre-historic times and the modern day. It tells us that how in the ancient times people were more inclined towards building close knit relationships with complete harmony as compared to today when all that seems to be important is money. Over the time as humans had made advancement into scientifically equipped world, things has started to change. As the humans has started to evolve so is the future world, things would no longer be the same.
